Fishing Tips & Best Practices

Payload planning and conservative return margins.

Operating reminders

- Confirm the payload system is correctly installed.
- Stay within the aircraft's applicable payload limit.
- Plan outbound distance with conservative battery reserve.
- Account for wind on the return leg.
- Practice release operation in a controlled environment before demanding missions.

Owner note: These guides are designed to support the owner journey and do not replace the current aircraft manual, manufacturer policy, carrier rules, or applicable aviation requirements.
