Emergency Procedures

A quick owner response guide.

Abnormal flight

• Prioritize people and property safety.

• Use the aircraft manual's lost-link, RTH and emergency procedures.

• Land as soon as practical when behavior is abnormal.

Water/crash event

• Do not repeatedly power a damaged aircraft.

• Isolate visibly damaged batteries.

• Document the condition and create a service case before shipping.

Owner note: These guides are designed to support the owner journey and do not replace the current aircraft manual, manufacturer policy, carrier rules, or applicable aviation requirements.
