Warranty & Service Path Guide

Choose the correct warranty, paid repair or preventive support path.

Manufacturer warranty

• Prepare proof of purchase, model, serial number and detailed symptoms.

• Coverage is determined under the applicable manufacturer policy; submitting a request does not guarantee coverage.

Paid repair

• Crash damage, corrosion, wear, exclusions and expired coverage may move to a paid estimate.

• Customer approval should be captured before paid repair proceeds.

Preventive support

• Setup, inspections, saltwater aftercare, controller issues and maintenance can be handled separately from a repair.

Owner note: These guides are designed to support the owner journey and do not replace the current aircraft manual, manufacturer policy, carrier rules, or applicable aviation requirements.
