Battery Safety Guide

Inspection, charging, storage and transport reminders.

Do not use

• Swollen, leaking, punctured, overheated or physically damaged batteries.

Routine care

• Use the correct charger and settings.

• Charge in an appropriate supervised area.

• Inspect connectors and wiring.

• Store according to the battery/manufacturer guidance.

• Follow carrier rules before shipping lithium batteries.

Owner note: These guides are designed to support the owner journey and do not replace the current aircraft manual, manufacturer policy, carrier rules, or applicable aviation requirements.
